remoteness from the noise and dust of the
Agents for the Harlford Live Stock to many for warming buildings with pure heated air, and it was put up in the almshouse at Philadelphia, to warm that building, the certainty that our great city park will be the full amount of lustrance on my fave release. and was so successful that it was commended as a proper means for warming render these lots very desirable. The best ded on the 17th Let. mended as a proper means for warming churches, hospitals, manufactories and other places." Charles Lamb describes the slowness with which improvements grew for roasting plgs. He says that for many generations the only method known was by putting the buildings, because an accidental fire of a dwelliughouse first produced the discovery of roast pig, and the accidental method was followed for a long period, as the only possible way of securing that great luxury—roast pig, and literal propositions made to our first was so favorable, reasonable to our first control of the securing that great luxury—roast pig, and literal propositions made to our first control of the securing that great luxury—roast pig, and literal propositions made to our first control of the securing that great luxury—roast pig, and literal propositions made to our first control of the securing that great luxury—roast pig, and literal propositions made to our first control of the securing that great luxury—roast pig, and literal propositions made to our first control of the securing that great luxury—roast pig, and literal propositions made to our first control of the securing that great luxury—roast pig. a long period, as the only possible way of securing that great luxury—rosst plg. This has always been regarded as one of charles Lamb's best jokes, but whether jest or reality, it is not a bad portraiture of the slow marches of many other inventions. Notwithstanding Petitione's success in heating public buildings with the propositions made to our working propositions made to our working propositions made to our working people. We shall expect them to embrace the offer with avidity, and in a few years witness a new town with a teeming period, and the control Ma'n and Preston Propositions made to our working people. We shall expect them to embrace the offer with avidity, and in a few years witness a new town with a teeming people with a proposition of the court of Ma'n and Preston Propositions made to our working people. We shall expect them to embrace the offer with avidity, and in a few years witness a new town with a teeming people with a point of many of the propositions made to our working people. We shall expect them to embrace the offer with avidity, and in a few years witness a new town with a teeming people. Also agreet the price section of propositions made to our working people. We shall expect them to embrace the offer with avidity, and in a few years witness a new town with a teeming people. We shall expect them to embrace the offer with avidity, and in a few years witness a new town with a teeming people. We shall expect them to embrace the offer with avidity, and in a few years witness a new town with a teeming people. We shall expect them to embrace the offer with avidity, and in a few years witness a new town with a teeming people. We shall expect them to embrace the offer with avidity, and in a few years witness a new town with a teeming people. We shall expect them to embrace the offer with avidity, and the propositions are to embrace the offer with avidity, and the propositions are to embrace the offer with avidity and the propositions are to embrace the offer with avidity and the propositions City Court of Louisville. stoves, the idea of heating private dwellings with sloves slumbered an incredible

his line.

enness and disorderly conduct the following persons were presented and thir located, are but seldern choosed of cooking stoyes into Kentucky. tion of cooking stoves into Kentucky, cases disposed of in the manner mention-'Henry Maler" cooking stove. It is said rigan, fined \$3. that the germ of the cooking stove sprung from the attachment of an oven arrangement to the Franklin stove. The first cooking stove was an oblong-shaped thing, with the oven running the entire length, and the door for feeding the cooking stove was districted by the cooking stove was an oblong-shaped thing, with the oven running the entire length, and the door for feeding the cooking the door for feeding the cooking stove the door for feeding the cooking the cooking stove the door for feeding the cooking the cooking stove the door for feeding the cooking the cooking stove the door for feeding the cooking the cooking stove the door for feeding the cooking stove the door for feeding the cooking the cooking stove the door for feeding the cooking stove the cooking stove the cooking stove the cooking stove was an oblong-shaped thing, with the oven running the entire length the cooking stove was an oblong-shaped thing, with the oven running the entire length the cooking stove was an oblong-shaped thing, with the oven running the entire length the cooking stove was an oblong-shaped thing, with the oven running the entire length the cooking stove was an oblong-shaped thing, with the oven running the entire length the cooking stove was an oblong-shaped thing, with the oven running the entire length the cooking stove was an oblong-shaped thing the cooking stove was all the cooki There was in this contrivance a boller-hole and a boiler on the top, near the pipe. In 1812 Mr. Hoxie made the first great given for the conditions. The conditions of the co reat step for the cooking stove. He was E iza Smith, stealing \$20 from Garrett well mat ed will be found at this house. he first to elevate the fire-box above the Emerson; discharged.

It would be very interesting to look Sloane, white boy, with intent to kill; the old Red Show- asc, No. 13; upon the immense variety of inventions continued until Wednesday. upon the immense variety of inventions in atoves for heating houses and for cooking purposes. We have seen multitudes of them and have investigated their merits. There are many good stoves for both purposes. We have never yet seen the superior of Henderson's cooking stove. It is the most economical in the use of fuel of any stove known to the first term of the largest and best stocks of children's cooking stove. It is the most economical in the use of fuel of any stove known to the first term of the largest and best stocks of children's cooking stove. It is the most economical in the use of fuel of any stove known to the first term house for beautiful the first term house from \$1.50 to \$5.10 a stoves for beating houses and for cookcooking stove. It is the most economical in the use of finel of any stove known to us, and it gives results that have never been equated by any other cooking stove. The patentee guarantees that at the end of two hours of the burning of a single supply of fiel a loaf of bread can be thoroughly laked in the oven of his stove in forty minutes, the oven of his stove in forty minutes, and he also guarantees that a similar last customers "fits."

Our clever frieud Papendick will be fund there at all times ready to give Deppen's customers "fits."

The field the product of the field Papendick will be fund there at all times ready to give Deppen's customers "fits."

from the lighting of the are. The oven is CHEAP DRY GOODS -Our many lady Little All-right is all ways there with good sup one of the most capacious and perfect we readers, and the public generally, will of grocerl. The new idea all right, have ever seen in a cooking a eve. This find the conspicuous advertisement of stove is called "The Premer B mino" Mesers. Crumbaugh & Hamilton else-Coal Cooking Stove." It burns coal in lump or in that form called slack, the call their special attention to it. These latter making the most enduring and the enterprising and clever gentlemen are de-steadiest heat. It has a very perfect method for heating water in circulating boilers be bought anywhere, and, so far as their or in barrels. The fire in this stove con- stock is concerned, they have one of the den sumes all its gases and combustible qual- largest and best in the city. We advise two n (ampbell and Webz let cets, on the reities that are wasted by all other seves. all who want anything in their line to morning, November 11 h 1 - 7, at 1 The Stewart cooking stove is one of good pay them a visit. They will find the with the Horses W.g.n. cows (at t. 1) proprietors attentive and the clerks powith other stoves this "Premier Cooking Stove" will soon pay for itself in saving fuel, for in this quality it has no rival in this market. It does not need cleaning the form of five times, a year.

The Openhand Avenue.—The citizens of New Albany, as well as all persons living in l'ortland and along the avenue, are truly indebted to our worthy Mayor.

Anch i.e.'y needs not need the control of the Control for Rogelts' 116 nier Coal Cooking Stove. In comparison lite.

more than four or five times a year.

The Stewart Parlor Stove is the superior of Henderson's Victor stove for heating parlors. Stewart's parlor stove may safely defy competition in all the excellencies that should be found in a parlor atove, and in its economic use of fuel. It has just undergone friend, Mr. Kelley, and is now one of the most pleasant, as well as safest, streets in the city. The space between the tracks, and under the charge of the railroal company stove we have ever seen, and is unquestionably the most healthy stove ever well as the city is safly out of repair. We trust it will soon receive their attention. usstionably the most healthy stove ever will soon receive their attention. used in a parlor. A fire may easily be Dissolution.—It will be seen by an al- Rollett holl, it. I bound a kept in it day and night, from the begin-vertisement elsewhere that Mr. Wil, S ning of cold weather in the fall until the Morgan has retired from the 1 rm of
